Guy Wire Insulator

In the event of a lightning strike to your antenna mast, prevent dangerous high voltage from reaching the ground through guy wires with these porcelain insulators.

Generally two insulators are fitted on each guy wire; one near the top of the antenna mast and another half way down the length of the guy wire.

8769 Guy Wire Insulator

- ⇒ Grey Porcelain
- ⇒ 5,450 kg Tensile Strength
- ⇒ 6 cm x 4 cm x 4 cm
- ⇒ Suit guy wire up to 7 mm diameter
