

### Section 3

## RF HARDWARE

Updated 25 October 2011

### RF Hazard Warning Signs

At many broadcast sites, levels of electromagnetic radiation emitted in various areas can exceed the safe limits limits for human exposure.

In these circumstances Warning Signs should appear to identify those hazardous areas around the site to comply with Occupational Health and Safety Regulations, Australian Radiation Protection And Nuclear Safety Agency (ARPANSA) standards and AS1319 (Standards Australia 1994).

ZCG Scalar can supply appropriate Warning Signs regarding general public exposure limits, non-ionising radiation and restricted areas.

**Order Code : WS-BL**

Size : 30 cm x 20 cm

**Order Code : WS-BS**

Size : 20 cm x 13 cm

**Order Code : WS-RL**

Size : 30 cm x 20 cm

If you wish to vary the standard text appearing on these signs, then please provide us details.

A quotation for custom design colorbond steel signs can be provided upon request.

There are no holes drilled in these signs, leaving you the option to mount them by whatever method suits their intended location.

**Order Code : WS-YT**

Size : 30 cm x 20 cm

**Order Code : WS-YU**

Size : 30 cm x 20 cm

**Order Code : WS-YD**

Size : 30 cm x 20 cm
