MARINE ANTENNAS

Updated 21 February 2011

MMA Mast Mount Adaptor

The **MMA** Mast Mount Adaptor is an aluminium tube 250 mm long x 25 mm in diameter with 1"-14 UNS male thread.

Any or our ZCG Scalar Marine Deck Mount Antennas fitted with the MM1 or MM2 folding base can be very easily converted to a mast mount antenna in 3 simple steps :

1. Unscrew and remove the antenna top from the MM1 or MM2 deck mount base.
2. Screw the antenna top onto the aluminium **MMA** mast mount adaptor tube.
3. Use 2 parallel clamps to mount the antenna to a mast. **EB1SS** stainless steel clamps will be ideal.
