### DATA LINK ANTENNAS

Updated 21 February 2011

### CM Series MAX-GAIN NEXT G or GSM Mast Mount Cellular Mobile Phone Antennas

**Frequency**  
825 – 960 MHz

**Bandwidth**  
NEXT G or GSM

For high gain Data Link applications in either the NEXT G or GSM frequency ranges, these 8.1 dBi omnidirectional mast mount models will be ideal.

The white fibreglass radome and stainless steel mount tube stands 2.4 metres tall. The antenna is matched internally by a unique transforming printed circuit board.

The N-Female connector located at the base of the mount tube is rated for up to 20 watts input power.

➤ **CM1600AM** is factory tuned to cover the NEXT G network, 825 to 890 MHz.

➤ **CMG1600AM** is for the GSM network, 890 to 960 MHz.

All components used are of the highest quality to ensure long term survival in the harshest weather conditions and environments. These antennas will deliver reliable performance for many years.

Mounting clamps, feeder cable, connectors and other accessories are available separately to complete the installation.
