TECHNICAL SERVICES

Updated 25 October 2011

Antenna System Installations

Correct installation is essential to achieving the very best performance out of any antenna. To ensure you get the most out of your ZCG Scalar antenna, engage the manufacturer to also professionally install the system for you.

Can ZCG Scalar install antennas I purchase ?

- ⇒ The Technical and Field Services Division is fully trained to install the entire ZCG antenna range.
- ⇒ We can also help with the installation of NON-ZCG Scalar antennas.

How much does an installation cost ?

The cost of installation depends upon many variables. To request a quote, send the Technical and Field Services Division an email, or give us a call and we can discuss your options. Some details you should include in your email are:

- ⇒ Your contact information.
- ⇒ The site location and access.
- ⇒ Distance to the nearest town.
- ⇒ Type of installation structure. (e.g. tower, mast, roof, building.)
- ⇒ Type of antenna and any other items that need to be installed.

What installation services do ZCG Scalar offer ?

ZCG can offer as much as or as little as you require. Some of the installation services on offer are:

- ⇒ Basic rigging labour hire.
- ⇒ Installation consultation.
- ⇒ Full installation project management – for larger projects/systems.
- ⇒ Antenna and site commissioning.
- ⇒ Steelwork mounting design/supply.
- ⇒ In-building rigid line design and construction.

What are ZCG Scalar's capabilities ?

- ⇒ Qualified Technical Riggers.
- ⇒ System Testing/Commissioning.
- ⇒ Installation Report Supply – including 'As Installed' performance plots.
- ⇒ Project Management Services.
- ⇒ Antenna System Design and Supply.
- ⇒ Mounting Steelwork Design and Supply.

If you would like further information about ZCG Scalar's Installation Services, please contact the Technical and Field Service Division.
