ZCG Scalar

Innovate to provide maximum productivity and design to your individual specifications

Manufacture to the highest industry standards

And provide expert ongoing after sales **support**

plus a 2 year warranty.

trusting
the signals

Effective broadcasting should come naturally.

At ZCG Scalar, we haven't evolved overnight.

We have over 30 years experience and expertise in design, installation, repair and optimisation of antennas, both domestically and internationally.

ZCG Scalar is an Australian family owned and operated business with its engineering and production facility located in East Gippsland, Victoria.

ZCG Scalar has built a reputation for providing technical advice and offering practical engineering solutions to its business partners involved directly and indirectly with broadcasting. We are proud to have worked with clients ranging from national operators to community radio stations, government and legislative authorities.

The **long eared bat** has evolved extremely large ears which help it to detect even the tiniest movements of prey. These tiny bats hunt at night using echolocation, and can catch fish as they break the surface of still lakes at night. For these creatures, trusting their signal is instinctual and a matter of survival.

Are you responsible for the station's technical integrity?

Are you confident that your broadcast signal is meeting its performance requirements in terms of coverage, penetration and signal density?

Are you confident that it will continue to do so?

ZCG Scalar is the natural choice for all your radio and television broadcast antenna requirements based on the following:

- As one of Australia's leading RF and broadcast antenna specialists we understand the importance of your station's systems being reliable and performing consistently.
- We can work with you to ensure you broadcast at optimum levels by providing innovative solutions created, designed and engineered specifically to meet all your operational needs.
- We work with you to evaluate, measure and maximise your broadcast signal levels and offer suggestions and recommendations.
- We have the capability to undertake theoretical modeling as well as physical field tests to evaluate the performance of your system.
- We are well known for providing the most economic custom antenna design and broadcast solutions including tuning, adaptations, upgrades and supply of associated products that compliment antenna systems.

ZCG Scalar is ISO 9001 accredited providing clients with complete confidence that ZCG Scalar products are of the highest quality and are covered by a two year warranty. This means we offer both performance and reliability.

Contact our experienced team today to discuss your specific needs on **(03) 5157 1203** or view our extensive range of services and products at **www.zcg.com.au** and register to receive regular product and service updates that focus on the broadcast issues that are important to you.

Effective broadcasting should come naturally.
